

ECASB Business Connection

The diversity of C&S's abilities is unique in the industry, enabling them to support an incredible range of project types and specialties. They can streamline the delivery of even the most complicated multi-discipline projects by drawing on their significant in-house resources. Their experts collaborate and combine their knowledge to deliver the best solutions to each client. They are as proficient at complex, diverse, multimillion-dollar projects as they are at small projects involving only one trade. Coordinating projects from inception through construction provides a continuity of service that clients rely on. C&S uses state-of-the-art equipment, and the latest technologies to deliver tomorrow's solutions to you today. C&S works for local, state, and federal government; the private sector; industry; developers; and the military. They support projects throughout the United States and the world with a deep bench of services. For more than fifty years, C&S has focused on improving the world around us. Their versatile group of experts work as an integrated team, identifying and implementing well-rounded, comprehensive, and resilient solutions.

C&S Companies is a long time sponsor of ECASB, and a 2025-2026 Platinum Level Sponsor

C&S Companies is a comprehensive engineering, design, and construction firm trusted by clients nationwide. They collaborate closely with clients, working together to fulfill their vital infrastructure objectives and contribute to the betterment of their communities.

C&S provides construction management, energy performance contracting, and engineering support to K-12 schools across the region. They have a solid resume of experience on both new facilities, additions, and renovations. They have extensive first-hand knowledge of the crucial elements necessary for the successful construction and operation of K-12 school facilities. Their expertise includes initial project need evaluations, concept programming, concept design, preliminary budget, projected construction aid calculations, and State Education Department document requirements for capital projects. They have worked closely with SED-assigned project managers and architects. They conduct project review meetings for school boards, public meetings, and pre-referendum informational meeting and public comment. C&S has completed many forms of SED documentation, including letters of intent, preliminary submission, final submission, certification of completion, building evaluation forms, annual inspections, building condition surveys, and five-year plans.

Energy Performance Contracting

C&S Companies was one of the first energy services companies in New York State to integrate energy-efficient LED lighting technology and adaptive lighting control systems together. They have paved the way for school districts and municipalities to maximize their staff comfort, enhance their work and educational environments and significantly reduce their overall utility expenditure annually.
